

1 ABSTRACT

2
3 This invention relates to the diagnosis and treatment of cancerous diseases,
4 particularly to the mediation of cytotoxicity of tumor cells; and most particularly to the
5 use of cancerous disease modifying antibodies (CDMAB), optionally in combination
6 with one or more chemotherapeutic agents, as a means for initiating the cytotoxic
7 response. The invention further relates to binding assays which utilize the CDMABs
8 of the instant invention.
